BDD Scenarios

Scenario 1: Successful Registration

Feature: Page Registration
As a visitor
I want to be able to register on the website
So that I can vote for a sport car

Scenario: Successful registration with valid credentials
    Given I am a visitor on the registration page
    When I enter a valid username
    And I enter a valid password with at least 8 characters
    And I submit the registration form
    Then I should see a success message confirming the registration

Scenario 2: Password Validation

Feature: Page Registration
As a visitor
I want to be able to register on the website
So that I can vote for a sport car

Scenario: Password validation during registration
    Given I am a visitor on the registration page
    When I enter a valid username
    And I enter a password with less than 8 characters
    And I submit the registration form
    Then I should see an error message indicating the password requirements

Scenario: Password validation during registration (Missing Uppercase)
    Given I am a visitor on the registration page
    When I enter a valid username
    And I enter a password with 8 characters, but without an uppercase letter
    And I submit the registration form
    Then I should see an error message indicating the password requirements

Scenario: Password validation during registration (Missing Lowercase)
    Given I am a visitor on the registration page
    When I enter a valid username

And I enter a password with 8 characters, but without a lowercase letter
And I submit the registration form
Then I should see an error message indicating the password requirements

Scenario: Password validation during registration (Missing Special Character)
Given I am a visitor on the registration page
When I enter a valid username
And I enter a password with 8 characters, but without a special character
And I submit the registration form
Then I should see an error message indicating the password requirements

Scenario 3: Duplicate Registration Prevention

Feature: Page Registration
As a visitor
I want to be able to register on the website
So that I can vote for a sport car

Scenario: Prevent duplicate registration
Given I am a visitor on the registration page
And I have previously registered with the same username
When I enter the same username
And I enter a valid password
And I submit the registration form
Then I should see an error message indicating that I am already registered

Scenario 4: Invalid Username Registration

Feature: Page Registration
As a visitor
I want to be able to register on the website
So that I can vote for a sport car

Scenario: Invalid username during registration
Given I am a visitor on the registration page
When I enter an invalid username (e.g., containing special characters or spaces)
And I enter a valid password
And I submit the registration form
Then I should see an error message indicating that the username is invalid

Scenario 5: Failed Login with wrong credentials

Feature: Page Registration
As a visitor
I want to be able to login on the website
So that I can vote for a sport car

Scenario: Failed login with incorrect credentials
    Given I am a visitor on the login page
    When I enter a valid username
    And I enter a wrong password
    And I click on the login
    Then I should see an error message indicating that the login failed
